EXAM: Introduction to Oracle9i: SQL
EXAM NUMBER: 007
DATE: June 30, 2008
SITE NUMBER: 118

PASSING SCORE: 37 YOUR SCORE: 41
GRADE: Pass

Hands On Course Requirement for New OCPs

There is a Hands-On Course Requirement associated with most Oracle Professional-level certifications. Those pursuing Oracle Associate Level certifications, or upgrading a prior Professional-level certification, do not have to meet a course requirement.

For Professional certifications, your credential will be awarded only after you have satisfied all requirements: passing the exams, attending the required course(s), and completing the required forms or assignments, if any.

Visit the OCP website at <http://www.oracle.com/education/certification> to verify the requirements for certification.

Please accept our congratulations on your success. Feedback on your performance is printed below. The following report lists the objectives for which you answered a question incorrectly.

You may want to review and study the following objectives:

- Create and maintain constraints
- Create and maintain indexes
- Sort the rows retrieved by a query
- Use character, number, and date functions in SELECT statements
- Use conversion functions
- View data that generally does not meet a join condition by using outer joins
- Use group functions
