

Tuesday, December 6, 2022 12:30 PM

Git remote -v  
`git log --oneline`

Git restore --staged  
`src/main/java/com/daimler/iq4bus/masterconfig/api/service/ReleaseCheckpointService.java`

`git remote set-url origin https://git.t3.daimlertruck.com`

`git restore --staged <file>..." to unstage"`

`git add -u 4git reset -- main/dontcheckmein.txt`

Below command to reset with out edit  
`ls -R | grep -i "B22"` List file in directory with matching with B22

Git reset -- commit id -- no edit  
`git reset 56e05fced`  
# Moves pointer back to previous HEAD  
`git reset --soft HEAD@{1}`  
`git commit -m "Revert to 56e05fced"# Updates working copy to reflect the new commit`  
`git reset --hard`  
# Push your changes to respective branch  
`git push`

`git stash list`

`git apply stash apply n`

`git clean -n`

Forking repo in git is used to migrate the repos from one to another.

```
ps aux | grep java - Find java process running  
Ps -auf | grep java  
netstat -ltnup - Find Process id running
```

Screen java -jar filename to run the program in backend  
Ctrl+alt+a then ctrl +A then d to detach

```
netstat -tulpn | grep LISTEN , find port used in linux server 9
```

```
mount -t cifs "//53.254.42.131/s152f004.tr152.corpintra.net/E152_IQ4Bus/16_Go  
Live/Archive_Documents" /home/eevo_011_a_suryanv/iq4source/latest -o  
user=eevo_011_a_rkazaro
```

```
who -b  
last reboot | less
```

Umount -l directory for force full unmount

Below command to change password for other user  
passwd eevo\_011\_a\_rkazaro

df -h to check space available

-- Not to generate the nohup.out file  
nohup command >/dev/null 2>&1

JUnit with mockito frame work : [Spring Boot Testing | Writing JUnit Tests using JUnit and Mockito | Java Techie](#)

# Junit
